

# Multiplication Battleship

## Directions for Multiplication Battleship

- This game is best played in partners
- Each child needs their own page (Consider laminating for repeated use)
- Each child colors in their ships on the top grid
- Partners take turns choosing a location to attempt to "bomb" They do this by stating the equation (ie  $8 \times 8 = 40$ ) They mark their attempts on the lower grid
- When every part of a ship has been hit it is sunk
- If a partner misses, the other partner simply says, "Miss"
- If a partner hits, the other partner simply says, "Hit"
- If a partner says the answer to the equation incorrectly, the other partner simply says, "Miss"

Aircraft Carrier	covers 5 spaces
Battleship	covers 4 spaces
Submarine	covers 3 spaces
Destroyer	covers 3 spaces
Patrol Boat	covers 2 spaces

Place your ships around the board.  
Take turns bombing each others board in an attempt to sink your partner's ships.

Bomb a space on your partner's board by saying the equation that matches where you want to bomb. ( $5 \times 8 = 40$ )

Record your attempted hits here:
